

1) Please download the Filezilla FTP Client for your system from <https://filezilla-project.org/> to access data on our FTP and install it on your machine.

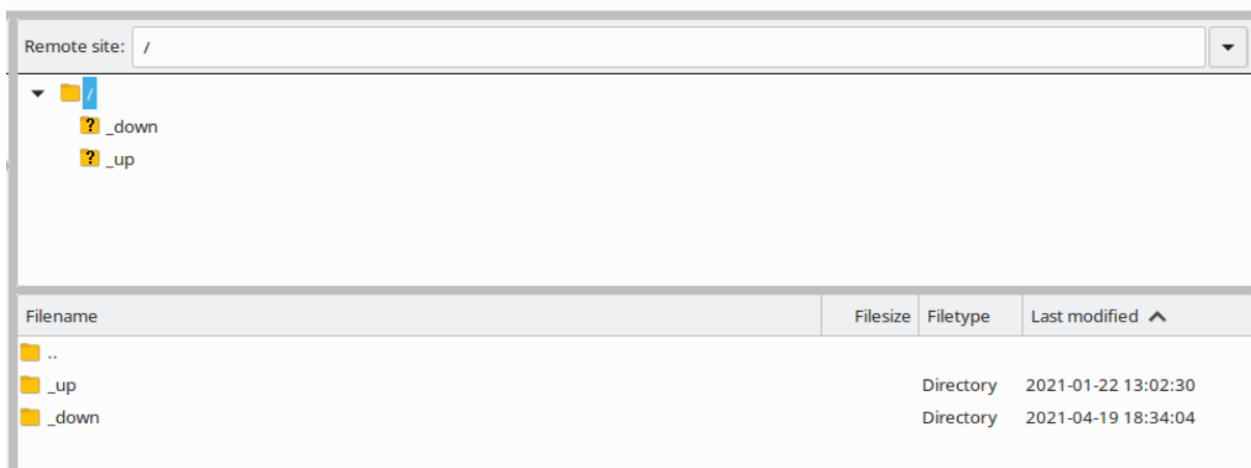

2) Launch Filezilla and enter the credentials as shown here:

- Host: <ftp.geo.tuwien.ac.at>
- Username: esacci\_sm\_v061
- Password: \*\*\*\*\* (Note: You find the password in the email you received after registration)
- Port: 22

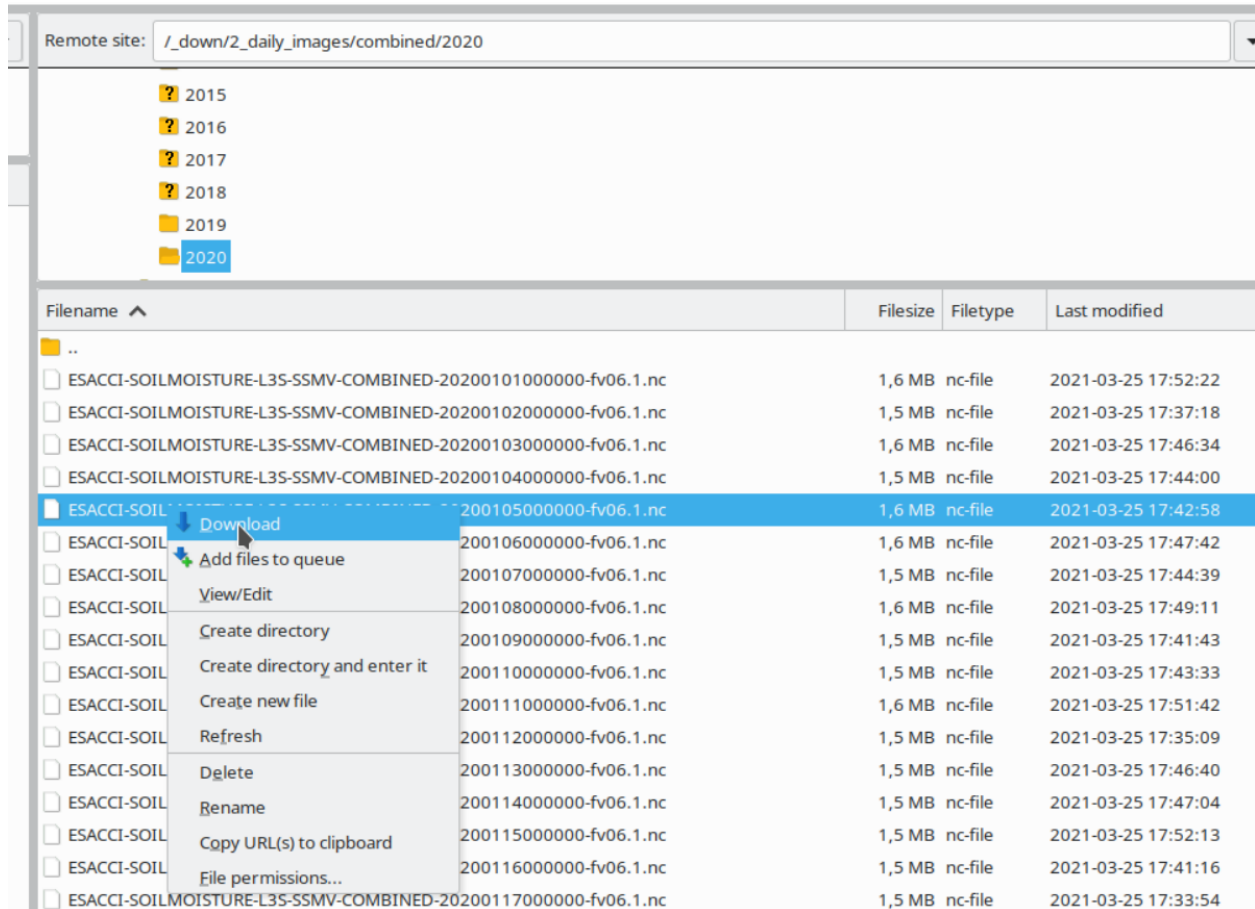

3) Press "Quickconnect" to connect to the FTP. Press "OK" in case you get a message that "the server's host key is unknown".

4) When the connection is established, you will see 2 folders in the right panel of Filezilla under "Remote Site": "\_up" and "\_down". The CCI data in in "\_down"

5) If you now browse to e.g. "/\_down/2\_daily\_images/combined/2020" and right-click on a file you can choose to download it (the same works for a folder). In this case the netcdf file for ESA CCI SM v6.1 COMBINED for Jan 5th 2020.

Be aware that Filezilla will download the file(s) into the directory that is specified on the left side of Filezilla as "Local site" (therefore you must have write access there, but you can change the directory of course).

There is documentation on the product in `"/_down/1_doc"` and ancillary files in `"/_down/4_ancillary"`
